Signed \_\_\_\_\_ Date \_\_\_\_\_

### IMPORTANT INFORMATION FOR DAY OF SCREENING

**DO NOT walk your dog prior to exam, full bladders will provide the best images.**

1. For the best quality images, Scotties must have a shaved belly area. The technician can shave your dog on the day of however, you may also do it at home. No skirt needs to be shaved.
2. All dogs to be screened must be CURRENT on Rabies vaccine and you must be able to produce the tag or certificate from veterinarian.
3. The US technician may not discuss any findings or images. A report will be emailed to you within 48 hours of the screening
4. All results will be in the report and in the images on the flash drive.
5. You will be given a flash-drive containing the images to take to your vet.
6. Volunteers will be there to escort you to the registration and give you a number . Participants will be called by number in order of registration/arrival on site. You will be checked in by a volunteer in the lobby outside the Savannah Room where you may wait with your dog until it is your appointment time. Following the same procedures followed by most veterinary facilities, your dog will be taken into the Savannah Room by a volunteer for scanning. At the completion of scanning your dog and flash drive will be brought to you.
7. Due to Covid19 restrictions all social distancing measures will be observed and masks are required both inside the building and when speaking outside with the volunteers.

**State of Illinois restrictions and advisements related to COVID-19 will be strictly adhered to.**
